

Mitigating Risk Exposure for MTSA Facilities and Vessels

FORTIFI*i*DTM
ENFORCING TWIC SECURITY.

Rugged • Affordable • Secure

FortifiD is a portable, wireless reader that electronically authenticates and validates the Transportation Worker Identification Credential (TWIC) used by MTSA facilities and vessels. **FortifiD** displays a clear pass/fail inspection result in less than four seconds thereby reducing operational, business and compliance risk by improving the consistency of TWIC inspections.

The FortifiD solution is unique for a few reasons:

- Risk-free subscription
- Complimentary hardware refresh*
- No IT infrastructure required
- Rapid deployment
- Cloud based

How It Works

Inspection results are displayed prominently in green or red across the **FortifiD** screen, removing any confusion about an access decision. Results are then securely transmitted using an encrypted cellular connection to the **FortifiD 360** portal for demonstrating compliance with the USCG.

Electronic Authentication

The **FortifiD** electronically authenticates the TWIC through a challenge/response protocol, using the unique electronic identifier within the credential itself. If the TWIC has been forged, the **FortifiD** will notify the guard that the credential could not be authenticated and displays a red failed inspection result.

Electronic Validation

The **FortifiD** electronically validates that the TWIC is not expired and that the credential's FASC-N is not on the Canceled Card List (CCL). If the TWIC is expired or on the CCL, the **FortifiD** notifies the guard that it is expired/canceled and displays a red failed inspection result.

Pass Inspection

After a TWIC has been electronically authenticated and validated, the **FortifiD** displays a green trusted inspection result, clearly indicating to guards how to proceed.

Product Benefits

- ✓ Improve Security
- ✓ Automate Random Screening
- ✓ Document USCG Compliance
- ✓ Reduce Gate Backups
- ✓ Improve Inspection Time
- ✓ Maintain Access Records
- ✓ Simplify Guard Training
- ✓ Easy to Use

FortifID is a game changer when it comes to mitigating dangerous and costly security risk exposure...It seems an obvious choice to both reduce the vulnerability to, and the consequences of, a security incident.

— Edward Seebald, President of Seebald & Associates International

FortifID's Flexible Subscription Model

FortifID is available on an affordable monthly subscription basis. For those who want to achieve even greater savings, annual and multi-year subscriptions are also available. If the **FortifID** does not meet your TWIC inspection needs for any reason, simply return it and cancel your subscription.

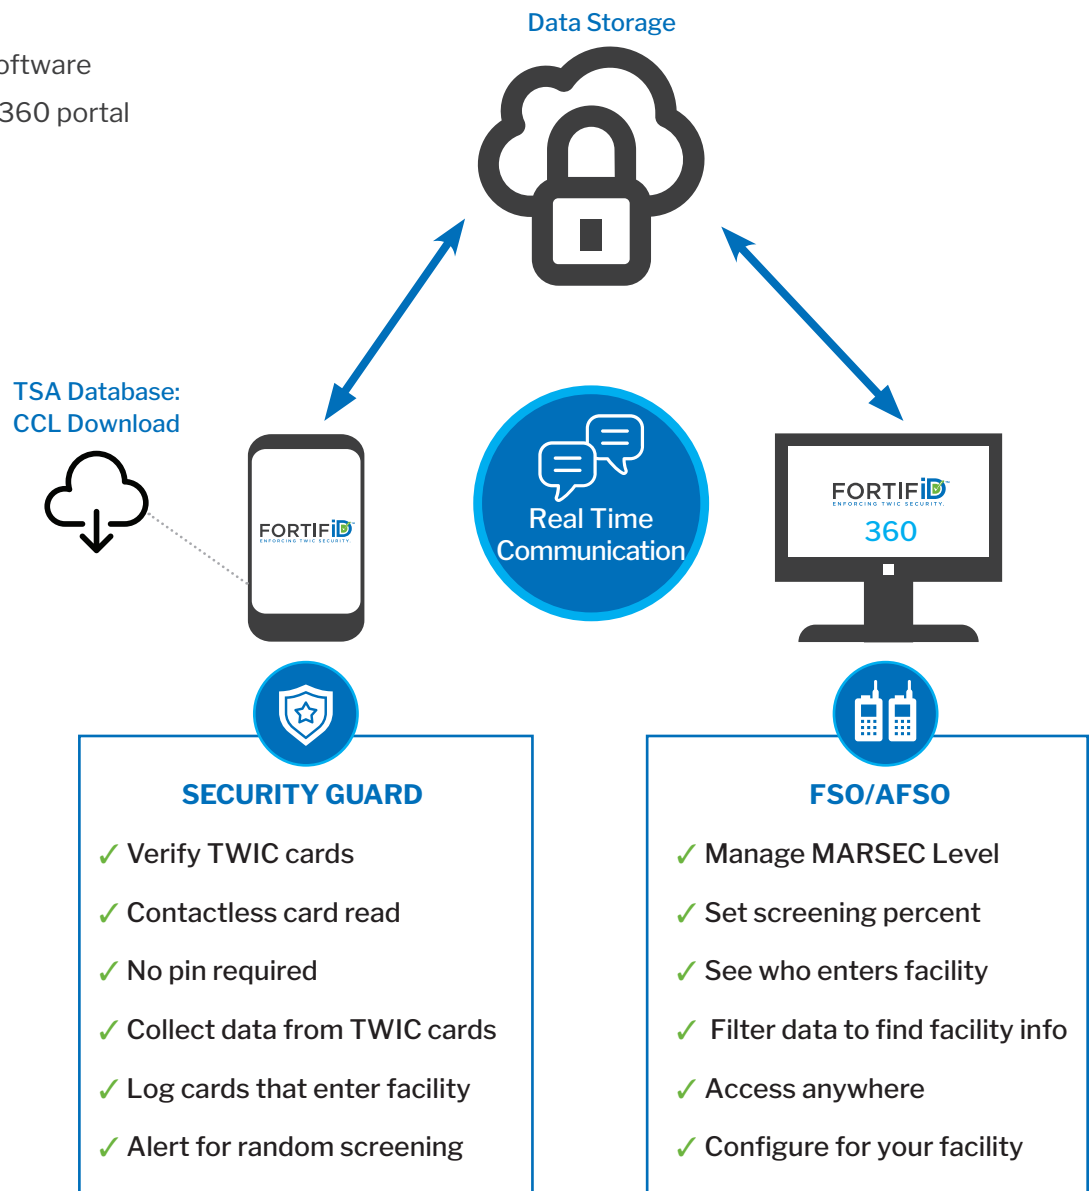

The standard subscription includes:

- ▶ FortifID portable reader
- ▶ FortifID mobile inspection software
- ▶ Standard access to FortifID 360 portal
- ▶ Maintenance
- ▶ Support
- ▶ Software upgrades

****PLUS****

Hardware refresh*

The FortifID Solution

*Hardware refresh includes replacement of the FortifID portable reader hardware when a new model is released. Some restrictions apply. See the FortifID Subscription Service Agreement for details.
